The wearing of academic costume is a tradition that has persisted from the Middle Ages, when the first Universities were founded.

The regalia vary slightly from one University to another and, within a University, according to the status of the wearer.

At The University of British Columbia both the undergraduate's and Master's gown are black and of the ordinary stuff material.

The colours for the degrees are:

B.A.—University blue  
B.F.A.—University blue with magenta cord  
B.A.Sc.—Scarlet  
B.Com.—Light grey with black and grey cord  
B.Ed.—White with University blue cord  
B.H.E.—Turquoise  
B.L.A.—Maize with scarlet cord  
M.L.S. (M.I.L.S.)—Cadmium yellow  
M.A.S.—University blue with silver and cadmium yellow twisted cord  
B.Mus.—University blue with alizarin crimson cord  
B.Sc.—Light blue  
B.Arch.—Scarlet with white cord  
B.D.Sc.—Lilac and red cords on white  
D.M.D.—Lilac and red  
Ed.D.—Royal blue and light blue, with chevron of University blue, white and gold  
B.H.K.—Malachite green  
B.Sc.(Agr.)—Maize  
B.Sc.(Diet.)—Turquoise with gold and white twisted cord  
B.S.F.—Brown with green cord  
B.Sc.(Forestry)—Brown with light blue cord  
B.S.N.—Scarlet with twisted cord of University blue and white  
B.Sc.(Pharm.)—Dark green with scarlet cord  
B.Sc.(O.T.)—Scarlet and white twisted cord on royal blue  
B.Sc.(PT.)—Scarlet and white twisted cord on royal blue  
B.S.W.—Magenta  
LL.B.—Amethyst violet  
M.D.—Scarlet and royal blue  
B.M.L.Sc.—Scarlet and royal blue twisted cord on white  
M.H.A.—Red and pale blue  
M.A. (Planning)—University blue with dark green and slate grey  
M.Sc.(Planning)—University blue with dark green and white  
M.H.Sc.—Scarlet and grey  
PH.D.—Blue and gold  
D.M.A.—Royal blue and alizarin crimson with blue and gold chevron  
Pharm.D.—American style with lining of University blue and with chevron of University blue and gold

The Bachelor's hood is edged with the distinctive colour. The Master's hood is the same as the Bachelor's, except that it is lined with the distinctive colour. The hood for the M.Sc. (Bus. Admin.) is similar to that of the M.Sc., with grey trim and black and white cord. The hood for the M.Eng. is the same as that of the M.A.Sc., except that it is trimmed with a cord of University blue.

The regalia of the Ph.D. consists of a gown, Cambridge style, of maroon silk with front facing-panel and sleeves of University blue with gold piping; a hood, Cambridge pattern, of blue silk outside and gold lining; a cap, decanal bonnet, of maroon silk with gold cord and tassel. The Ed.D. regalia consists of a gown, Cambridge style, of black stuff, a hood, American style, with lining of light blue and with chevron of University blue, white and gold; a cap, decanal bonnet, of black stuff with gold cord and tassel. The D.M.A. regalia is similar to that of the Ed.D. with hood lined with alizarin crimson and a chevron of University blue and gold. The Pharm.D. regalia consists of a gown, Cambridge style, of black stuff with front facing panel and sleeves of dark olive green with gold piping; a hood, American style, with lining of University blue and with chevron of University blue and gold; a cap, decanal bonnet, of black stuff with gold cord and tassel.

The hood for the honorary degree LL.D. is of scarlet broadcloth lined in dark blue velvet; for the D.Sc., it is lined in dark purple and for the D.Litt., it is lined in cream.
FACULTY OF AGRICULTURAL SCIENCES - CO-WINNERS

F. Brian Holl
Department of Plant Science

Dr. Holl is an outstanding instructor who exemplifies the ability of the best teachers to provide students with a stimulating and thought-provoking learning experience. He is a lively and engaging lecturer, who consistently receives very positive reviews from his students. In the classroom he presents an effective mixture of passion and humour that students find easy to respond to. His interaction with students is challenging, warm and non-hierarchical, without losing authority as a master in his field. Moreover, his commitment to teaching extends far beyond the classroom as Dr. Holl happily spends time with students to discuss controversies, concepts and questions in the hallway, over coffee or in his office.

Dr. Holl constantly strives to bring innovation and creativity to his instructional goals. Whether it is designing laboratory exercises that give students a first-hand experience with plant breeding, establishing a journaling program within a class of over 100 students, or organizing teamwork research projects, he knows how to create "functional knowledge" for his students. He inspires them, challenges them and leaves them feeling that they have a lot to offer the world when they leave his classes. It is for these qualities that Dr. Holl is being recognized today as an outstanding teacher.

Eunice C.Y. Li-Chan
Department of Food Science

Dr. Li-Chan is being recognized for her dedication to innovation and excellence in the teaching of students. As an instructor of an upper level analytical methods course, she has innovatively met the challenge of having all students conduct hands-on experiments, with extremely limited laboratory facilities. She has incorporated in-class, small group discussions, in which students clarify the distinguishing characteristics between analytical methods. She has developed computer-based modules to assist students in visualizing the concepts unique to these various methods. In this manner all students receive the training they require to meet the challenges facing them as technical experts in the food industry.

Dr. Li-Chan extends her teaching interactions with students well beyond her formal university courses. This past year she was a successful co-applicant to the Teaching and Learning Enhancement Fund, for the development of computer modules for several Food Science courses. She is an active member of the Women in Science group, and enthusiastically promotes education in the preparation of women students for careers in science. She is an effective role model to young female students.

In short, Dr. Li-Chan is committed to teaching. She does so with a great deal of enthusiasm and skill. Her courses are designed not only to impart knowledge in innovative ways, but also to encourage students to seek out and apply this knowledge using new and emerging technologies.

FACULTY OF APPLIED SCIENCE

Philip Hill
Department of Mechanical Engineering

Professor Hill has the very strong support of both our undergraduate and graduate students for this award. They consider him to be a superb teacher and he is also well known nationally and internationally as both an outstanding scholar and teacher. In addition to being a dynamic and authoritative classroom teacher, he goes out of his way to stimulate students to think for themselves and to truly understand the material he is teaching.

Professor Hill is able to make the difficult subject he teaches, thermodynamics, come alive, and he instills a sense of excitement in all who listen to him lecture. In addition, Professor Hill is an outstanding graduate supervisor, and spends a great deal of time meeting graduate students individually. His research on improving engine combustion enables him to add reality and authority to his teaching. He is also the author of two internationally recognized textbooks at the graduate level, of which one "Mechanics and Thermodynamics of Propulsion", is generally regarded as the standard work in the field.

Michael Jackson
Department of Electrical and Computer Engineering

We are pleased to honour Professor Jackson with this prestigious award. Although Professor Jackson has been at UBC for only five years, he has shown an outstanding ability to articulate information in a way students can understand and relate to, and the capability to motivate and encourage his students. For his abilities to explain the complex physical workings of electronic devices, Professor Jackson has obtained truly remarkable evaluations from his students. Professor Jackson's teaching is enhanced by his excellent and industrially applied research on field effect transistors and fibre optic electronics. He brings this deep knowledge of microelectronic processes to the classroom, and this is an important factor in helping him explain these complex processes to his students in a clear and dynamic fashion.
FACULTY OF ARTS

Lyn MacCrostie Rae  Arts One
To find a Killam prize winner in an interdisciplinary program like Arts One is a rarity — not because the teachers in Arts One are not brilliant, but because the obstacles to brilliance are formidable. One must teach a large group of first-year students outside one's area of expertise. One must set aside one's training which, in the case of Lyn MacCrostie Rae, lies in the fields of Greek and Roman History and Latin, and teach books chosen by a committee.

To garner the highest teaching scores in such circumstances — a rating of 5 on a 5-point scale — is all but unheard of. And to win the praise of one's colleagues in this collaborative enterprise, as well as the accolades of one's students, is a remarkable achievement. "I found her lectures more helpful than my own when it came to the seminars," writes one of Dr. Rae's colleagues, "and I have since used her method." Whatever that method may be, it is a source of hope and inspiration for all who confront the challenges of interdisciplinarity at UBC. Dr. Rae is at once passionately intellectual, endlessly supportive of her students, and a great team-player. "Not enough praise can be given," writes one of her students. And all her colleagues in Arts One endorse this view of Lyn Rae.

George McWhirter  Department of Theatre, Film and Creative Writing
George McWhirter's great inspirational force as a creative writing teacher derives from a magical sense of each of his students' special gifts: "They do not learn to write like George McWhirter," as one of his colleagues puts it. "They become better at writing like themselves."

The result of his intuitive understanding of what makes each student unique is a response to his teaching that borders on idolatry. "His ability to draw out the real poem from a loose scattering of words," writes one of his enthusiasts, "is almost uncanny." And not only does he draw the poem out of the poet, but he also turns his students into expert readers of "that amazing Pinocchio creature, the poem."

Little wonder that his prize-winning students, who have helped to shape the literature of Canada, speak of him as Magus, Proteus, and Muse. "Good teachers exist," writes one of his protégés, "many work at this university, but great ones are a rare alchemy. George McWhirter is pure gold."

Bruce Miller  Department of Anthropology and Sociology
"He didn't just teach anthropology," writes one of Bruce Miller's students. "He taught life."

The same insistent praise is everywhere apparent in the letters of commendation that have poured in for Dr. Miller from those who have been excited by the "singular passion" he brings to his classes; from graduates — like the principal of a Musqueam Indian Band school — who still consult him on educational and cultural matters; and from those who have shared the excitement of research in Dr. Miller's Ethnographic Field School projects among the First Nations communities.

There is a sense, among his students, that they are directly involved in vital contemporary issues, in the politics and law of anthropology, and in the professional practice of health-care and justice in the community. A single sentence in a student's letter sums up Dr. Miller's finest attributes as a teacher in Arts. "I believe he should be commended," it reads, "for being a talented instructor, a brilliant anthropologist and, most important, a true friend."

Christine Parkin  Department of English
As a teacher of composition, Christine Parkin wins high praise from her students for an "absolute clarity of explanation" conjoined to her delight and humour in presenting material. Her training as a lawyer and her acting talents clearly emerge in a unique fusion of alternative vocations — in addition to which one must add her passionate advocacy of children's literature.

There is a composite letter on file, with over 50 student signatures, which says it all of Christine Parkin. "She empowers. She'll look you straight in the eye and say, 'You can do it,' and you feel that you could become the next C.S. Lewis. She is more than just 'Mrs. Parkin' the teacher. We get to know Mrs. Parkin the mother, woman, student, humorist — a real person with hopes, dreams, foibles, disappointments, and recoveries. She exemplifies the union between life experience and academic wisdom."

Jerry Wasserman  Theatre Program and Department of English
"An English degree," writes one of his students, "is not complete without the absolute pleasure of one of Jerry Wasserman's classes." And even when these are scheduled at 8:30, there are students who will rise at 5:00 a.m. to experience this absolute pleasure. "He has the wisdom of a Buddhist monk" his Canadian Theatre class tells us. "The enthusiasm of a four year old, and the presence of a rock star."

To combine academic rigour and sheer delight in the instruction of drama is Jerry Wasserman's major triumph in the classroom. He has pioneered the study of Canadian drama as an essential discipline at UBC, building bridges between the world of professional theatre and film and the world of the classroom. He is the actor's teacher, and the teacher's actor. "His passion and enthusiasm for the subject he teaches is contagious to all who come in contact with him," writes a group of students — adding that they have placed Jerry Wasserman in the company of those who, like parents and lovers, have changed their lives. He is, simply put, "one of the best teachers any one of us has ever had."

Fall Congregation 1998 7
FACULTY OF COMMERCE AND BUSINESS ADMINISTRATION
Ruth Freedman

Dr. Ruth Freedman has been chosen as this year's winner of the UBC Killam Teaching Prize for her contributions to teaching undergraduate core courses in Finance. These courses involve some quite technical material, and they are required of all of our undergraduates. This causes many students to be wary of these courses, and so they can be difficult to teach.

Dr. Freedman has surmounted this obstacle using a variety of strategies. She has put a lot of thought into making the material flow smoothly, and to finding ways to present the essence of the technical material in a way that is understandable and interesting for the undergraduates. She has developed practical group research projects, and grounds her material in real business situations whenever possible.

Dr. Freedman has become quite a success in this, in two ways. First, she has received very good teaching ratings from the students, including in the core Finance course which impacts many students, and she has gotten a lot of very positive feedback from the students complimenting her on her approach. Second, she has shared the teaching materials she has developed with the other instructors of these courses, which has had an impact on all sections of the core Finance courses. In fact the average teaching rating of all instructors in core Finance courses increased with Dr. Freedman's involvement.

Dr. Ruth Freedman has helped to turn what was once a difficult experience for many students and instructors into a positive and rewarding experience for everyone. For this reason Dr. Ruth Freedman was awarded the UBC Killam Teaching Prize for 1998.

FACULTY OF DENTISTRY CO-WINNERS
Donal McDonnell and Colin Price

The Faculty of Dentistry traditionally has only one award. However, the student nominators felt strongly on the fact that Dr. Donal McDonnell and Dr. Colin Price provide a joint teaching team and that indeed they have effectively provided a seamless access system for the students seeking their guidance. The prize this year will be shared by Donal McDonnell and Colin Price.

Drs. McDonnell and Price have exemplified the model of stimulating students to learn through an interactive question and answer process. Students truly appreciate the opportunity to explore the complex decision making processes associated with advanced diagnosis in radiology while still within the comfort zone provided by caring and thoughtful mentors. While very time consuming for the teachers involved, the students all realize the value of this professional approach in developing the skills and concepts essential for ensuring excellence in their approach to patients and their fellow clinical colleagues.

FACULTY OF EDUCATION
Rita Irwin Department of Curriculum Studies

Dr. Irwin is a "teacher who makes a difference". She is eloquent and articulate. She brings out the best in her students, instills in them a quest for learning, creates a confidence which enables them to excel and provides them with the thirst to continue improving in their professionalism. Dr. Irwin has a passion for her subject a commitment to her students and models a form of feminist leadership that empowers others by valuing each individual. Her students, both teacher education and graduate students, respect her for her collegiality, her ethic of caring, her insistence on excellence and her ability to challenge. Dr. Irwin is considered a true educator.

Marion Porath Department of Educational Psychology and Special Education

Dr. Porath is called a "brilliant instructor, exemplary scholar and inspiring mentor". Adjectives such as knowledgeable, clear, organized, personable, dependable, approachable, encouraging, eloquent, empowering and thoughtful are used to describe her teaching style. By her example her students learn how team teaching can work, how to show respect for new and different ideas and how to make even the driest course material interesting. Dr. Porath believes in creating learning situations that engage the learner, requiring them to draw on their own expertise, examine their perspectives and develop their own framework for learning. Her teaching style offers a perfect balance of direction and freedom that makes learning an incredible experience.

FACULTY OF FORESTERY
R. Jonathan Fannin Department of Forest Resources Management and Civil Engineering

Jonathan Fannin was born in Northern Ireland and educated at the Queen's University of Belfast, before reading for a doctoral degree at the University of Oxford. His research addresses new techniques for soil stabilization. Following a period of work experience in Norway he joined UBC in 1989, to take up a joint appointment between the Departments of Forest Resources Management and Civil Engineering.

An award-winning researcher on slope stability and soil reinforcement, he strives to bring examples of problem solving (and the occasional lump of soil) encountered in university/industry research on landslides and forest practices back to the classroom and to introductory courses on soil mechanics. Dr. Fannin employs in his teaching a traditional approach to lecturing that is complemented by group and paired learning activities in the classroom to promote critical thinking.
FACULTY OF GRADUATE STUDIES
Richard Ericson  Principal, Green College

It is no exaggeration to claim that almost anywhere you look in the Humanities and Social Sciences (and indeed beyond into Science, the Applied Sciences and Medicine) Dr. Ericson has left his “footprint” on interdisciplinary and collegial research and teaching initiatives that enhance student opportunities for learning and scholarship. Not only does he carve out opportunities for student learning in spaces that hitherto have not been there, he performs ably in traditional classrooms in Sociology and Law, attracting students to stimulating seminars, and then working closely with them as supervisor of numerous theses and dissertations. Dr. Ericson seems to be able to turn any interaction with students into an occasion for learning enhancement, self-interrogation and understanding. These learning occasions take place every day, every evening, every weekend as he hones Green College into a community of teaching and learning symbolized by the motto “Ideas and Friendship”. As we all know, teaching takes place (or fails to take place) in a variety of settings beside the classroom or office. There are no classrooms at Green College and the only offices are administrative. Nevertheless, thanks largely to the action and example of Dr. Ericson, Green College has become a true academy within the academy.

FACULTY OF LAW
Claire Young

Professor Claire Young is an outstandingly successful Law teacher who specializes in a field that, one might think, holds little scope for garnering that kind of reputation – taxation. Her students and colleagues agree that she has a number of rare qualities that let her breathe life into what might otherwise seem a cut-and-dried subject. She reassures the students who dread tax, and enables them to see the structure that underlies the apparently confusing detail. To the students who are confident about the subject, she offers challenging new insights. She encourages all her students never to be content with the surface of the rules, but to explore the policies and assumptions that have shaped the rules. And she always wants them to see how things work out in human terms. As one student put it, “Prof. Young obviously loves what she does, and she manages to make a subject like Tax Law fun for everyone by teaching its practical implications.”

As an expert in feminist legal theory, she also takes care to place law in its social context. Her students praise Professor Young’s gentle determination that everyone in the class should understand each point, and her generosity with her time: both in and outside class, to ensure that they do. In her seminar teaching she uses innovative means to lead her students to the most active possible engagement with the material. Whatever the format of the class, she takes special pains to give as much feedback as she can. To all students undergraduate or graduate, even ones who are not officially “her” students at all she gives tirelessly of her enthusiasm, her expertise and her guidance. She represents the finest qualities of a Law teacher.

FACULTY OF MEDICINE
Richard Arseneau  Department of Medicine

Dr. Arseneau is a model teacher and exemplifies many modern teaching techniques including evidence-based medicine and other aspects of teaching epidemiology on the Clinical Teaching Unit. He has been the leading light at St. Paul’s Hospital in importing evidence-based medicine evaluation techniques, incorporating epidemiological and statistical theory into clinical practice and making it interesting. Dr. Arseneau was the recipient of the Association of Canadian Medical Colleges Young Educator’s Award for 1996 in recognition of his major contribution to medical education in Canada. As well as being a great “hands-on” teacher, Ric has also devoted himself to theory of education and has applied this to his clinical and teaching practice as well as imparted it to his colleagues. Ric is an excellent example of someone who is focused academically, which has allowed him to have had significant achievement over a short period of time. UBC has benefited greatly through his work and achievements.

Carol-Ann Cournaya  Department of Physiology

Dr. Cournaya is a natural leader and a terrific teacher who has been heavily involved in many aspects of our teaching program since 1983. She has worked with the TIPS Program (Teaching Improvement Projects System) since 1988 and has led many workshops at UBC and the Universities of Western Ontario and Saskatchewan. In the new medical/dental undergraduate curriculum Dr. Cournaya has led and taught Problem Based Learning Workshops designed to train existing faculty to become tutors, and case writers in a PBL setting. She has been inspirational in developing and implementing a new interdisciplinary problem based graduate course with a grant from the Teaching and Learning Enhancement Fund. Carol-Ann epitomizes a truly inspirational teacher. She has the ability of simplifying difficult concepts in many aspects of basic and clinical physiology. Her knowledge is broad, firmly based, and clinically relevant. Dr. Cournaya has demonstrated her ability to organize other faculty around shared educational values, to inspire and lead in the creation of a new and meaningful course and to present her educational work in the scholarly environment of her peers. She embodies the future of professional education in which teaching goes beyond excellence in the classroom, in which teaching is inspiration and empowerment of learners.

Margaret McCuaig  School of Rehabilitation Sciences

Margaret McCuaig is an accomplished and respected teacher as well as a mentor and collaborator with academic colleagues, health care providers and the community. Students were delighted to participate in nominating Margaret McCuaig and commented on her teaching excellence and the impact she has made in their personal and professional lives as follows: “She has enriched my learning experience and respect for people”; thoroughly enjoyed her enthusiasm and humour; and “it was empowering” as students to be part of her course”. Her educational innovations, creative teaching strategies, humour, and commitment to course and curriculum development are among the tangible reasons why she is held in such high esteem by colleagues and students. She is supportive of her colleagues in developing their teaching expertise and problem-solving and mentors full-time and part-time faculty, sessional instructors and guest lecturers through informal
conversation, planned consultation, peer-review evaluations, review of course and/or class materials and the conceptual development of courses as related to the curriculum as a whole. Margaret is esteemed by past and present students, colleagues and the community for her depth of knowledge, understanding, patience and respect for the importance of educating tomorrow’s decision-makers.

FACULTY OF PHARMACEUTICAL SCIENCES
Marc Levine

Dr. Marc Levine, Associate Professor in the Division of Clinical Pharmacy of the Faculty of Pharmaceutical Sciences, is a very worthy recipient of this year’s UBC Teaching Prize. Dr. Levine is well known for his teaching abilities having been selected on two occasions, 1988 and 1998 by the students in the graduating class for the master teacher award. He was also selected in 1988 for the Squibb Award for excellence in teaching and was among the earliest of recipients to receive this national award. Dr. Levine has been described as earning the respect of his students by treating them as colleagues, by exuding confidence while lecturing and for his outstanding ability to communicate his ideas. He is particularly skillful at presenting intellectually stimulating concepts and encouraging the active participation of the students in exploring new ideas. By so doing he creates an engaging classroom environment that provides an active catalyst for an effective learning process.

Dr. Levine has been an active participant in the development of curricula having initiated and/or participated in the teaching of therapeutics to pharmacy students whereby they learn to detect, prevent, and to resolve drug related problems. He successfully coordinated and taught in one of the original integrated courses within the Faculty and was actively involved in the planning of the first Pharm. D. degree program in Canada. He was instrumental in the design of the Residency Program in Community Pharmacy Practice that was also one of the first such programs in Canada. At the graduate level he organized a teaching skills’ workshop for graduate students and assisted in the design of a process whereby graduate students prepare a teaching portfolio and have their teaching skills evaluated. He has been a member of the Faculty’s Teaching Evaluation and Development Committee since 1994 and has served as the chairman of that committee since 1996. Through leading by example and by fostering teaching development within the Faculty, Dr. Levine has contributed significantly to the overall skills of our teaching faculty. He is truly a deserving recipient of this year’s UBC teaching prize.

FACULTY OF SCIENCE
Carol Ann Borden  Department of Botany

Carol Ann Borden is a senior instructor in the Department of Botany. Carol Ann is the instructor for the major second and third year biology laboratories on the study of plants and algae. The importance of the laboratory to these life sciences courses cannot be underestimated. Carol Ann has been very effective in sparking her students’ interest in the complex relation between plants and their ecology and evolution. She makes extensive use of living material and the students are often required to collect, identify and preserve their own specimens. The students leave these courses having acquired practical experience in working with plants and recognizing their importance in our environment. Her laboratory manuals, which she writes herself, are clear and informative. Carol Ann has won the respect of the students and teaching assistants in her laboratories and they are passionate in their praise of her accomplishments. She takes a personal interest in their education and professional development. Finally, she is an educator who continually strives for excellence and encourages this quest in her students and associates.

Chris Orvig  Department of Chemistry

Chris Orvig teaches second year inorganic chemistry. Professor Orvig’s rapport and dynamics with his classes is inspiring and “amazing”. Enthusiasm is the cornerstone of his teaching methodology. He engages his students in the process of learning so that they feel they are an essential part of that process. He involves the students in the presentation and assimilation of the material and he stresses concepts and problem solving as a means to learning. Chris’s teaching evaluations are truly spectacular and indicate the students’ appreciation for his efforts on their behalf. Chris frequently illustrates the concepts presented in his lectures with relevant and thoughtful examples from the research laboratory. Thus the students see that what they are learning is at the cutting edge of inorganic chemistry.

Chris Waltham  Department of Physics

Chris Waltham currently teaches first year physics. In these courses Professor Waltham brings a wealth of demonstrations to illustrate the principles about which he is lecturing. His lectures concentrate on concepts and the linkages between physics and the other sciences, Chris clearly loves his teaching and pedagogy, and he devotes long hours to these endeavours. The student evaluations in Chris’s courses reflect this effort and clearly show that the students value his commitment to their education. For several years Chris has been involved in outreach programs. For example, he directs a Physics Summer Camp for school children and he developed a laboratory in which undergraduate students create and prepare demonstration experiments for high school use. In addition Chris has been involved in the selection, training and evaluation of the students for the International Physics Olympiad.

O Canada! Our home and native land,
True patriot love in all thy sons command.
With glowing hearts we see thee rise,
The true north strong and free!
From far and wide, O Canada,
We stand on guard for thee.
God keep our land glorious and free!
O Canada, we stand on guard for thee,
O Canada, we stand on guard for thee.

MUSICAL PROGRAMME

THE UBC SCHOOL OF MUSIC

Director: Professor Martin Berinbaum
An increasing number of UBC alumni and friends realize the vital role they play in the life of the university. Their contributions provide key support for UBC’s commitment to service through excellence.

Basic support for the university comes from tuition fees and from the Government of British Columbia and the Government of Canada. However, many important areas are not covered by such funding, creating opportunities to support university priorities through private donations. Alumni and friends play a critical role in supplementing government funding to build on UBC’s tradition of achievement.

With more than one hundred academic departments, schools, research institutes and centres administered by the faculties, opportunities for support are many and varied. UBC has tremendous expertise among faculty and strong academic programs reflecting community needs on which to build.

In 1989, UBC launched the World of Opportunity Campaign. It was designed to provide the facilities, equipment, scholarships and endowed chairs required for academic distinction. When the campaign wrapped up in 1993, private sector and government donations totalled more than $260 million, making it one of the largest university fund-raising campaigns in Canadian history.

The university wishes to express its appreciation to those who demonstrated their commitment to the ideals of the university and their awareness of its needs. Your generosity contributes immeasurably to the vitality and strength of UBC.

Be assured that UBC will strive to continue to merit your confidence and support.

For further information about gifts to UBC, please contact the Development Office, The University of British Columbia, Vancouver, B.C. V6T 1Z1, Telephone 822-8900.
